configure: WARNING:

There is an installation error in jpeg support. You seem to have only one of either the headers `_or_` the libraries installed. You may need to either

provide correct --with-extra-... options, or the development package of libjpeg6b. You can get a source package of libjpeg from <http://www.ijg.org/>
Disabling JPEG support.

config.status: executing depfiles commands

Configure results (user options):

OFX plugin: yes
OFX direct connect: yes
Chart support: yes
SQLITE3 support: yes

Configure results (developer options):

Memory leak check support: no
Qt-Designer library support: no
PDF document generation: no
CPPUNIT support: no

You are missing the CPPUNIT headers and libraries
The unit test framework support won't be compiled.
This is not relevant for the usage of the application.
Unit tests are only required by the developers.

Good - your configure finished. Start make now

```
